Dear my sweet Selena, now I am able to upload them to my FTP server, thanks! The password for FTP, it is none, please visit the link: to set the password for FTP server. The password for WIN, It is none, please visit the link: to set the WIN password. This is the "Synchro Direct" text file. I want to replace: E:/cfbc/ ...with /E:/cfbc/ How to that? A: Open the Synchro Direct file and find the string in the lines which looks like:

${SYNCHRONIZER_DIR}`/${CFBCDIR} and change it to look like: ${SYNCHRONIZER_DIR}/${CFBCDIR} This will change the matching line of the Synchro Direct text to: .../E:/cfbc and the other lines are unaffected and should work as is, as long as your files (both the Synchro Direct text file and the files you have uploaded before) are in the same folder. Save the file and run the Synchro Direct tool again. That should work. 23497-B18]\]. We acknowledge that, because the trial was designed as an observer-blinded study, we were unable to ascertain whether the visit to the physician might have been a first instance of symptomatic sepsis. Our data suggest that it is, as the proportion of patients for whom there is a clinical suspicion of sepsis who visit a physician is somewhat higher than that of patients who are sick enough to consult an ED physician. Comparable proportions of patients are seen at the ED in the respective arms in each trial center, indicating that the onset of the trial and the allocation of patients to treatment were based on a balanced protocol. There was

only one report of protocol noncompliance \[[@r10]\] in which adherence to the trial protocol was incomplete. This study site also had the least severe illness of all participating sites. The study was based on 0cc13bf012
