The movie is not just a struggle for survival, but the worst kind for those who have been shot down. Sulu is a housewife, Do you know that in the Â .Image copyright Reuters Image caption Warner Bros. and DC want to build on the success of Man of Steel After Superman's death in the Zack Snyder blockbuster Man of Steel, Warner Bros. and DC Comics are determined to bring the character back. The studios say they plan to make a sequel, even though the last picture only made $735m at the box office. The success of the stand-alone movie was a springboard for Warner Bros. to revive the DC Comics series Batman, which has traditionally been in a competing comic book universe with Superman and the Justice League. Superman's cameo in Man of Steel - the culmination of six years' worth of storylines and images in other films - attracted new potential fans to the franchise and Warner Bros. is not letting the opportunity slip. "It's a tremendously smart move on the part of Warner Bros. to launch the sequel now," says Jason O'Neill, senior vice president of box office analysis at entertainment site Box Office Mojo. And DC comics fans seem to agree. "It was cool seeing him in the movie and I thought it was great they brought him back in the next movie," said Tom Biebeck, 18, a fan at a cinema in Philadelphia. Image copyright Getty Images Image caption Director Zack Snyder is a vocal fan of the character "I went with my friend. It's one of the few superhero movies I've seen," said Laura Washington, a doctor's assistant in Rhode Island. "When he is giving the world his best shot, he becomes vulnerable," said Andrew DeGraff, 25, a television producer in Connecticut. "It's an amazing accomplishment for the character to lose his life and come back." Man of Steel is one of the biggest hits of the year so far, along with Inception and The Dark Knight Rises, with a $690m US total, although it has only a 35% fresh rating on Rotten Tomatoes. Critical approval for Man of Steel isn't at such a high level - it holds an 85% rating on Metacritic, the independent film review site - though fanbases appear to love it. "As a fan of the characters and the movies, I love to see a Superman
