Manage Your Team

Wrestling With Emotions: New Kid on the Block is more than just a random scenario-based game. If you don't understand the level of importance a game has in your life, I'd be surprised.

If you make a mistake while trying to save someone, you'll have to weigh the costs of that versus the fact that you'd have to deal with a teammate not buying you a drink. If you make a mistake trying to hear the words someone is saying, you'll be confronted with what we all fear: missing out on something that is important to us. It's funny how basic emotions come to us in our everyday lives, but just because they're basic doesn't mean they're not powerful. I should know.

Build Your Emotional Access Code

In the game, you don't have any "powers". You have an emotional access code to save someone. It's the same as any first-person game where you have to use your skills and choose which path to take. You'll have to make difficult calls throughout the game, and make brutal choices. None of this is forced. It's just a matter of the degree of difficulty you're comfortable with.

You don't have to like any of the wrestlers. Feel free to come up with your own however you want. This game is really about trying to understand the emotional world of someone else, and it won't matter what side of the ring you take.

Hear the New Kid

There are two sounds in *New Kid on the Block*. One is sound that plays when a wrestler's emotion is different from yours. The other is the "Kill Screen". I'm a fan of the Kill Screen sound.

It lets you take a strange journey through the lives of Sammy and Chipper. The story unfolds as you go through a series of dialogues, which are matched to specific situations on the character's life path. Along the way, you can meet a series of characters who teach you about different topics. Some of these characters are cartoon caricatures, while some are fully animated people. Some events are triggered by specific events or conditions in the environment, and others are triggered by the choices you make. Every character has a unique dialogue system, allowing you to select the appropriate response. And of course, Sammy can't do it alone, so you'll need to collect items for him. What's new in Wrestling With Emotions: New Kid On The Block:

? Wrestling with Emotions: New Kid on the Block? What if you were behind the door of a club where wrestling was taking place and someone said, "Wrestling is tawdry, mean, and filled with cash grabbers who rob the fans of their emotional investment in the matches." What if someone else said that wrestling wasn't real and that it's just "an obnoxious exercise in stretching and contorting your body to entertain ourselves," or that wrestling was "too cheap, foreign, degenerate, and barbaric to be taken seriously as art?" And what if you somehow transcended that conversation and liked wrestling and thought, "I bet, if I actually did it, I'd really love it"? For me, that's where things got started. I was a dreamer from birth, even beyond the dreams that were common to a youngster of the sixties who escaped New York City and the hippie mecca of San Francisco with a heavy suitcase in tow. I might have been a dreamer even before I had dreams. When I was six years old, I waded into the swamp of Greenwich Village, a neighborhood in New York City filled with bohemians and a prominent "homophile" community which flourished in Manhattan in the 1960s. I came upon the self-described bohemian Magic Theatre. At the time, it was a place that performed poetry out of the public's imagination, a place where "sewer people" (now known as "Street People") lived in the building's alleys and played amplified music on street corners. The refuge I found here was the creation of a poet/actor named Robert B. Beigel (I don't think there was such a thing as a director back then). The primary intention was to demonstrate to a wider public that human emotional vulnerability was a central aspect of man's existence, not something to be hidden away. I loved the theatre and bought the book Poetry from the Rubble for Five and Ten Cents (Well-Wrought Publications, 1965) that Beigel produced with the collective work being performed there, the titles of which I have forgotten, if ever read. The voice of Robert B. Beigel sounded like that of a Beat poet, at least to my ears. It made me want to write some of my own poetry and play music with street people. I'd stare at the bikes lying on broken street curbs in front of the Red Apple Café on Bowery, and it
