VSO Software 3D Photo Studio 5.5.5 crack 1 s.Q: filter and map with same function I have an array of objects: let array = [{m_id:1},{m_id:2},{m_id:3},{m_id:4}] What I need is to: with filter, find and return an object with m_id = 1. I've tried using filter but I don't know how to make a difference between 1 and the rest. My solution was to return the filtered object and then update it with a map function that searches for the element and updates the value with it. let array = [{m_id:1},{m_id:2},{m_id:3},{m_id:4}]; let m_id_1 = array.filter(x => x.m_id === 1) m_id_1.map(x => x.m_id = 1); I was wondering if this is correct or there is a better approach to do this. A: To update items of the array, use reduce instead. let array = [{m_id:1},{m_id:2},{m_id:3},{m_id:4}]; let m_id_1 = array.reduce((acc, x) => { x.m_id = 1; return acc; }, {}); console.log(m_id_1); Flatcams and Swivels Swivels are the go-to installation on most commercial flatcams. But there are also many different types of swivels that are not flatcams. Swivels are used to connect camera mounts to tripod bases. In some cases swivels are used as a stop-level for stabilizing and positioning, but there are lots of other purposes as well. Swivels are also known as ball screws, and have two axially-aligned ball 6d1f23a050
