I have used PC Tools before to fix PC problems, but lately I have more issues with my PC. I started when I went to install Steam on my PC to play "Grand Theft Auto V" and Steam downloaded an update and said I had an error, but then it won't remove the error from the program. I think it is something about that update, but I don't know what. I thought the problem was Windows Defender, so I disabled it and then the problem with Steam fixed itself, but then a few days later I had a lot of pop ups about system

errors. I'm not sure if the problem is Windows Defender or something else. I'm using Windows 7 64 bit in English and just downloaded the tools. A: To remove this error: Press WINDOWS + R to open run dialog Type "cmd" and press enter Type "cd C:\Program Files

(x86)\Steam\steamapps\common\Grand Theft Auto V" and press enter Type "cacls "+" Grand Theft Auto V" and press enter Type "chmod 700 "+" Grand Theft Auto V" and press enter Type "cls" and press enter Type "msiexec /a "+"Grand Theft Auto V" and press enter Reopen GTAV And that should take care of it.
