
DMIFIT Tool And HPBQ138EXE |TOP|

Hello all, I have a problem with HP and HDP. I lost access to the HP support site, now I am working without the tools (it is impossible to open HP support site due to the error. I do not want to use pre-selected tools found on the Internet, I want to be able to use my own tools. There is no option to update my BIOS, because I have lost access to the official tools. Therefore I downloaded the tools HPBQ138.EXE but when I run it, it goes on a strange screen and only flashes. What can I do? I had a hard time finding an HPBQ138EXE download at first. I got one from a site online. It was an older one. It did not work as well as the later version. However, I was able to make it work. The downside to this version is it does not work with newer devices. So basically, if you are using a newer device, you cannot use this utility and have to use the one that came with your device. But if you are using an older device, this utility will work. Anyone else have a problem with HP and 720 g7 (w36e2) not booting? I cannot use any tools to upgrade BIOS. This is a global problem since you cannot even find a program to flash a newer BIOS. HP's response is to not fix the problem. It is impossible to find a new BIOS flash program. hey guys. I have an HP g7 w36e2. Its a couple years old. I want to flash my bios. But everytime i boot it up, I get the message not found... Where can i get the HPBQ138EXE? Can i flash the Bios? Or should I get a new motherboard? I feel like I cannot use my laptop. Its been a couple years.. And i want my laptop to be working fine. DMIFIT tool and HPBQ138.EXE.
