(pdf) A Rapid Course In English For Students Of Economics Tom McArthur

**Download**

if your decision is to learn english in a foreign country, your best option is to learn with a course that will be accredited by the british council. this will give you a qualification and an official transcript of your work. for details on how to proceed please contact a british council office. to be a pharmacist you need a bachelor's degree in pharmacy. in college, you will take courses in chemistry, mathematics, physical chemistry, biology, pharmacology, economics, statistics, pharmaco-therapeutics, pharmacology, computer science, clinical pharmacy, and a wide variety of engineering sciences including pharmaceutical, environmental, and industrial engineering. a good college education can help you in these professions: mcarthur and his colleagues subjected the 3 cohorts of children to an intervention that trained them to read words and sounds in a systematic way. the phonics training consisted of 40 hours of instruction, which was distributed across the school year with one-on-one tutoring every week, at least 60 minutes per day for the first 10 weeks, and then 3 hours of self-study each week for the rest of the school year.<sup>157</sup> this program provided a very intensive intervention in comparison to the 20 hours of instruction that children received in the control condition.<sup>158</sup> the phonics training was highly imitative, with the tutors modelling the correct pronunciation of the words they were to teach, and children were trained to associate the symbols representing the words with the sounds that produced those symbols. the tutors also demonstrated the correct rules for spelling, and children were trained to retrieve the sound symbol that corresponded to a spelled word and to write it on the board in the correct way.<sup>159</sup> the phonics training had no effect on spelling. however, children who had received the intervention showed gains in phonemic awareness (the ability to identify and manipulate the sounds in words), phonological awareness (the ability to manipulate word sounds), vocabulary, and oral language ability over the course of the study. the gains were most prominent at the end of the 10-week intervention and were maintained at the 12-month follow-up.<sup>160</sup>
