JSMin Crack

JSMin is a tiny JavaScript file compressor and beautifier. It was originally based on the excellent YUI compressor written by John Resig. JSMin is a reimplementation of the YUI compressor which supports syntaxes like "jslint" and "jshint". It is primarily useful for JavaScript, CSS, and HTML files, but can also work with other files with the correct configuration. JSMin is open source under the BSD license and is available for download from the main page. Features: Removes dead code. Shrinks the file size of the output. Gives the ability to specify whitespace removal settings. Supports output of LESS, CSS, and HTML files. Requires only a single line of code to run. Supports command-line arguments, which can be used to compress files from the command line. Generates readable, self-documenting code. Supports jslint and jshint settings. Requires only a single line of code to configure. Supports ANSI formatting for the configuration file. Friday, September 2, 2009 Its not the end of the world but I will be out of town for the next 4-6 weeks. With that said, I have made a site available that will allow you to download the latest version of the ZetaTribe Resource Pack. This is based on the newest version and when the release is live on github I will change the title above so you can see when to expect the release. So, after 4.0 and 4.1 came out, I went to do some testing with the resources in my end-of-beta version of ZetaTribe. Well, I found a bug. If you download the latest resources, you will notice that if you start a new faction, your existing factions and items will not be stored for you to be placed on the map. If this bug is not fixed, you will need to redownload all of your factions and items if you are having this issue. I will have it fixed as soon as I can. The latest version of the Resouce Pack and the site can be found at ZetaTribe Resource Pack, theres another similar site at ZT Resource Pack, so feel free to use those for the time being. A while ago, I posted a resource that will help you build 2D grids for your games. Now, I've got another one. I decided
