You can move around the contents of either clipboard and add them to the other. Two separate clipboards are better than one Windows Clipboard Expander enhances the functionality of the default Windows clipboard, allowing you to store multiple items at the same time. By default, it works in the system tray, but you can bring it back in focus using a simple hotkey (CTRL-SHIFT-A). Furthermore, it enables you to work with two separate clipboards simultaneously or use the cumulative clipboard to store all the information in one place. Please note that when using the cumulative clipboard (it must be active to work), you will have to send the data back to the Windows clipboard. You can append it either at the beginning of the text or to the bottom of the current clipboard entries. A history tab to store everything, and clippings to remember frequently used text The history tab is separate from the cumulative tab, meaning that the entries in History are not captured in the Cumulative tab as well. The list of entries can be rearranged and saved in a text file on your computer, but you can simply use the tabs of Windows Clipboard Expander to copy the items you need at some point and paste

## **What's New In Windows Clipboard Expander?**

Using Windows Clipboard Expander you can make your life easier and solve problems associated with the Windows clipboard. The app will store the copied text, including URLs, files, image attachments, and text, to the clipboard. You can access these copied items using hotkeys or use the context menu options. The latter lets you either use the cumulative or the history clipboard. In addition to this, you can save the items in a text file on your computer, rearrange them in groups, and add notes on each of them. Moreover, you can export the history and cumulative clipboards to an XML file to make it easier to view and edit. An improved user interface and a simple tool for copying text will enhance your productivity. It is worth mentioning that although the app can record both the history and the cumulative clipboard, you can set it to automatically add the copied items to the history or use the context menu options to use the cumulative clipboard. Windows Clipboard Expander Pros: - It can store data in the Windows clipboard. - You can organize your items in a way that suits your needs. - You can choose the text to be stored in the clipboard. - The app has a simple and intuitive interface. - It can store both the history and the cumulative clipboard. - It has a simple interface and you can edit the text to be stored. - You can export your clipboard in an XML file. - It records up to 500 items from the clipboard. - You can open text files stored in the clipboard.
