Re: A tool to manage books & journals using the Spreadsheet - in... "Install Inno Setup - Version 5.1.0..." I see that there are 3.8, 5.1, and 5.1.0 available. Quote: Originally Posted by Garry As a regular.NET developer - what features/tools of Inno Setup would you recommend? And is there anything else that you would like to see added to Inno Setup that you haven't seen before? I didn't see any real features of Inno Setup that would be hard to implement in VS2008 but that's probably because I'm an old fart. If you're talking about not being able to do the installation and running at the same time, you can do that by creating a setup that exits and then running it from the command prompt. I don't remember if it's possible to get an error message when it fails. Quote: Originally Posted by Garry I do not know if that is not all of it or if I only looked at the part that you sent me."
